

GOLDEN DOME. DATA IS THE NEW AMMUNITION.

SENSORS DON'T WIN WARS. SPEED, TRUST, & DATA DO.

A CONNECTED, MULTI-DOMAIN DEFENSE ARCHITECTURE

SPACE AIR LAND MARITIME CYBER PARTNERS

THE PROBLEM: DATA IS THE BOTTLENECK

DATA TAKES TOO LONG

DATA IS FRAGMENTED & UNTRUSTED

CROSS DOMAIN MOVEMENT IS COMPLEX

BAD OR DELAYED DATA = RISK TO FORCE

SENSOR INPUT

Raw data at the edge

SECURE DATA FABRIC POWERED BY EVERFOX

SECURE MOVEMENT

Cross domain data movement with speed and control

VALIDATE & VERIFY

Enable integrity, provenance, and AI/ML trustworthiness

FUSE & UNDERSTAND

AI/ML driven fusion for shared situational awareness

DECIDE

Speed enabled decisions at line & human speed

EFFECTOR OUTPUT

Action at the speed of relevance

THE OUTCOME: DECISION ADVANTAGE AT MISSION SPEED

DETECT, UNDERSTAND, DECIDE, ACT...FASTER

TRUSTED DATA ACROSS EVERY DOMAIN

MILLISECONDS MATTER

OPERATIONAL ADVANTAGE DELIVERED

DATA IS THE NEW AMMUNITION.

WITHOUT SECURE DATA, WE CAN'T WIN

FOUNDATION:

ZERO TRUST | IDENTITY | ENCRYPTION | POLICY ENFORCEMENT | CONTINUOUS VERIFICATION

EVERFOX

No One Delivers Golden Dome Alone

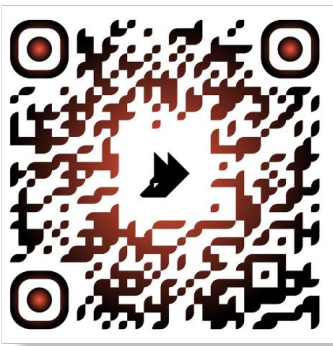

Golden Dome success is reliant on partnerships and collaboration across key industry partners.

Everfox enables:

- Secure data movement across classification levels
- Real-time coordination across systems and partners
- Reduced latency from sensor-to-decision
- Operation at speed, without compromising trust

Securing how data moves across domains, so it can be trusted, shared, and acted on at the speed of the mission.

Explore More:

Explore how to secure development channels, enable C2 missions, and operate at mission speed.
