DECISION DOMINANCE STARTS WITH DATA

Trusted Connectivity for AI-Powered Decision Making

AI is transforming how governments and agencies make decisions, enabling teams to process more information, identify patterns faster, and act in real time.

In high-stakes environments,
AI is only as effective as the
data behind it.

THE CHALLENGE

FRAGMENTED
Data spread across
systems and
environments

DELAYED
Information arrives too
late when timing matters
most

UNTRUSTED
Data lacks integrity
across domains and
cannot be verified

THE IMPACT

Slower
Decisions

Increased
Risk

Reduced Confidence
in AI Outputs

THE SHIFT

AI is only as powerful as the data it can reach, and
the data that matters most lives across domains,
classifications, and coalitions.

The new requirement: trusted data movement,
at the speed of decision.

Without this foundation:

- ✗ AI amplified data issues
- ✗ Insights become unreliable
- ✗ Speed becomes risk

From Data to Decision in Milliseconds

THE EVERFOX ROLE

Everfox provides trusted connectivity across complex environments, ensuring that the data powering AI is:

SECURE

Protected across domains and platforms

CONNECTED

Unified across silos, systems, and environments

REAL-TIME

Delivered instantly to those who need it most

IN ACTION

TACTICAL EDGE OPERATIONS

Real-time sensor and video data delivered instantly to those that need it most.

COMMAND & CONTROL

Faster trusted analysis across sources, classifications, and partners

INTELLIGENCE ANALYSIS

Secure data sharing across all environments and the classification boundaries that connect them.

MULTI-DOMAIN OPERATIONS

Secure data sharing across air, land, sea, space, and cyber

THE OUTCOME

Decisions made in milliseconds, not minutes

Access to data across every domain that matters

Confidence in every data source feeding AI

Decision advantage when it counts most

**SECONDS MATTER.
MILLISECONDS
DECIDE OUTCOMES.**

THE FOUNDATION FOR AI DECISION DOMINANCE

Everfox delivers connected data across the boundaries that protect the mission, so that AI can decide with confidence, at the speed of the mission.
